Help Hospice ease the pain.

A Syringe Driver is an essential piece of equipment that Hospice needs to manage symptoms like pain or nausea when a patient is unable to take medications orally.

This tiny little battery-powered device delivers medication continuously under the skin.

Due to the increase in patient numbers, and the fact that we have some older syringe drivers that need to be replaced before they malfunction, we urgently need more.

Your sponsorship of a syringe driver will be an invaluable gift to Hospice and our patients.
